## Encoder Design Rules at Your Fingertips...

Do you need to know if your controller has the bandwidth to handle the data rate of a 5000 cycle-per-turn encoder rotating at 2500 RPM... or what resolution you should specify for your encoder to achieve a 0.010" tolerance on a cut-to-length operation?

You'll have the answers to these and other critical questions right in the palm of your hand with the new Optical Encoder Design Calculator from BEI, the leading name in encoders.

## Electronics packaging protection from earthquake and other threats

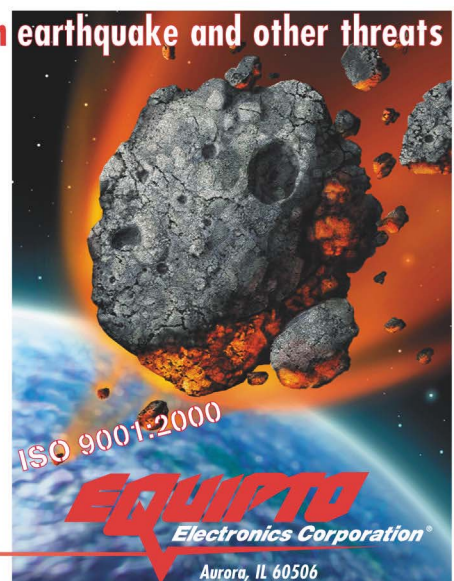

When the ground starts to shake, you don't want to worry about the shock and vibration resistance of the enclosure for your electronics system. Our Heavy Duty line can meet the requirements.

- NEBS TR 63 for Zone 4
- Mil-Spec 810 and 901
- FCC/VDE, EMP/TEMPEST
- Protection against dust, shock and vibration
- Exceptionally high EMI/RFI attenuation
- Shielded I/O access and air filtering
- ISO standards 9001:2000

For more information,  
call us: 800-204-7225  
fax: 630-987-5314
